

Todd:

I would like to thank The Chicago Industrial Pump Company and commend the team for a job well done in assisting our company and recommending Pitbull Pumps for the many applications in our facility. These pumps have replaced many centrifugal pumps that we had been using for many years. Upon the replacement of the pumps with Pitbull, our maintenance and repair cost has been reduced to a minimum. Due to the reliability and savings, I would definitely recommend Pitbull units for pump replacement and plan on using them in any future pump replacement where applicable.

Thanx.

Regards.
